SKILLS

Languages:	C++, Python, C, JavaScript (ES6+), HTML5, CSS3
Machine Learning & AI:	LangChain, RAG, Agentic AI, LLMs, NLP Pipelines, LSTM, Scikit-learn, Pandas, TensorFlow
Full Stack & API Development:	React.js, REST APIs, FastAPI, Node.js, Express.js, Socket.io, JWT
Core CS:	Data Structures and Algorithms, OOP, Computer Networking, DBMS
Databases & Caching:	MongoDB, MySQL, FAISS, Redis
Soft Skills:	Problem Solving, Effective Communication, Team Collaboration, Adaptability, Quick Learner

INTERNSHIP

UptoSkills, AICTE Internship Program – AI/ML Intern	Feb 2025
- Developed and deployed AI-based full-stack applications using Python, FastAPI, and React.js, enabling end-to-end delivery of production-ready ML features across iterative sprint cycles - Designed scalable NLP pipelines and computer vision inference services exposed via REST APIs, reducing manual processing overhead through automated model-serving layers. - Optimized model inference pipelines using profiling and batching strategies, improving API throughput and reducing average response latency across deployed endpoints.	

PROJECTS

Adaptive RAG – Agentic AI System with 3-Path Query Routing and ReAct Framework GitHub	May 2026
- Engineered an internal tool for agentic query routing, dynamically connecting across vector search, LLM, and live web search - Optimized in-memory vector search using FAISS HNSW indexing, reducing query retrieval time from O(N) to O(log N) and lowering latency from 2.1s → 0.2s - Structured document ingestion via Recursive Character chunking (1000-char size, 150-char overlap), preserving semantic boundaries across 500+ indexed segments - Applied query rewriting and fallback routing to ground LLM responses, reducing hallucination by 40%	
Tech Stack: Python, FastAPI, LangChain, FAISS, MongoDB, OpenAI API, Tavily Web Search, Pydantic, Streamlit	
AgriConnect – Role-Based Agricultural Platform with AI Diagnostics and Direct Commerce GitHub Live	Mar 2026
- Architected a multi-role MERN full-stack platform with tiered RBAC, serving 5 distinct user personas across the agricultural value chain - Built an expert-gated marketplace with cascading approval workflows and real-time Socket.io notifications, streamlining the farmer-to-buyer pipeline - Enabled a multilingual engine supporting 10+ languages using the i18n library - Deployed Redis caching, improving API response time from 2.3s → 0.8s - Built ML-driven crop disease detection model (CNN), achieving 93% accuracy on field image data	
Tech Stack: React.js, Node.js, Express.js, REST APIs, Python, TensorFlow Lite, MongoDB, JWT, Socket.io, Redis	
CineScope – Hybrid NLP-DL Sentiment Analysis GitHub	Dec 2025
- Constructed a hybrid sentiment classifier combining NLTK and LSTM, achieving 86% and 92% accuracy respectively - Implemented NLP preprocessing and mitigated data imbalance using class weights to improve generalization - Enforced context-aware model selection driven by linguistic complexity score, optimizing inference speed per input	
Tech Stack: Python, NLTK, LSTM, Keras, NLP, Streamlit	

CERTIFICATIONS

Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate Link	Mar 2026
AI-Powered NLP, AlgoTutor Academy Link	Aug 2025
The Bits and Bytes of Computer Networking, Authorized by Google Link	Sep 2024

ACHIEVEMENTS

Solved 450+ DSA problems across LeetCode, GeeksforGeeks, and HackerRank	Jun 2026
Ranked Top 5 among 50+ teams at Infineon Technologies Hackathon, building an Agentic AI Bug Detection system	Mar 2026
Secured 2nd place in a competitive Computer Networking workshop	June 2025

EDUCATION

Lovely Professional University	Phagwara, Punjab
Bachelor of Technology	Aug 2023 – Present
Computer Science and Engineering - AI/ML; CGPA: 8.39	
Narayana Junior College	Hyderabad, Telangana
Intermediate	Jun 2021 – Mar 2023
State Board; Percentage: 94.2
